

PRESS RELEASE**StatSoft Announces
UCB Uses STATISTICA as Global Analytics Platform**

StatSoft (Tulsa, Oklahoma)
February 13, 2008

StatSoft (www.statsoft.com) is pleased to announce that UCB (www.ucb-group.com) has deployed the **STATISTICA Enterprise** platform as a statistical software system in its Belgian manufacturing site of Braine. UCB is a global biopharmaceutical company with headquarters in Brussels, Belgium and operations in more than 40 countries.

STATISTICA Enterprise is integrated with UCB's data repositories including its laboratory information management system (LIMS). The integration to the data repositories streamlines access to data for analysts and scientists, making it easier and quicker to derive insights and make decisions.

The **STATISTICA Enterprise** system is used for a variety of applications including scientists performing ad hoc analyses through to standard reporting.

"The adoption at UCB is another example of StatSoft's growing focus on customers and applications in the life sciences market", says Robert Eames, Product Manager for Pharmaceutical and Life Sciences Solutions for StatSoft. "The release of the **STATISTICA Enterprise Compliance Edition** adds to our capabilities to deliver GxP solutions using the **STATISTICA** platform and make them easier to validate."

About STATISTICA

The **STATISTICA** Suite of Data Analysis Applications provides the most comprehensive collection of advanced analytical and data visualization tools (with more than 14,000 externally callable functions). The software is fully Web enabled, offers a selection of user interfaces, quick integration with virtually all database platforms, and is built upon an open, easily expandable architecture. **STATISTICA** has received the highest rating in EVERY independent comparative review in which it has been featured since its first release in 1993.

About StatSoft, Inc.
