

STATISTICATM CASE STUDY

STATISTICA Enterprise-wide SPC System (SEWSS) Receives Top-Notch Real-world Review from VISTEON Automotive in the Popular French Magazine QUALITE REFERENCES

VISTEON, one of the world's largest suppliers of automotive components and systems, gave rave reviews to *STATISTICA Enterprise-wide SPC System* in a recent issue of the popular French magazine, *QUALITE REFERENCES*.

VISTEON representatives claimed "SEWSS is actually only limited by our imagination." In the process of redesigning their SPC system and preparing for QS 9000 certification, they chose the *STATISTICA/SEWSS* system for a variety of reasons discussed in the article: "SEWSS is really flexible, and we could perfectly match the software to our current system, in a very easy and quick way: each entry is customizable (operator's name, lot number) which allows for very detailed analyses of the process variations. The extensive tools that are offered in SEWSS (DOE, multivariate analyses) was also an important aspect of our choice." VISTEON is clearly more than pleased with their choice, saying "As of today, our system grows very quickly, and is not limited by our software."
